1. The applicant is hereby notified that this International Preliminary Examining Authority transmits herewith the international preliminary report on patentability and its annexes, if any, established on the international application.
2. A copy of the report and its annexes, if any, is being transmitted to the International Bureau for communication to all the elected Offices.
3. Where required by any of the elected Offices, the International Bureau will prepare an English translation of the report (but not of any annexes) and will transmit such translation to those Offices.

The applicant must enter the national phase before each elected Office by performing certain acts (filing translations and paying national fees) within 30 months from the priority date (or later in some Offices) (Article 39(1)) (see also the reminder sent by the International Bureau with Form PCT/IB/301).

Where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary report on patentability. It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned.

For further details on the applicable time limits and requirements of the elected Offices, see Volume II of the PCT Applicant's Guide.

The applicant's attention is drawn to Article 33(5), which provides that the criteria of novelty, inventive step and industrial applicability described in Article 33(2) to (4) merely serve the purposes of international preliminary examination and that "any Contracting State may apply additional or different criteria for the purposes of deciding whether, in that State, the claimed inventions is patentable or not" (see also Article 27(5)). Such additional criteria may relate, for example, to exemptions from patentability, requirements for enabling disclosure, clarity and support for the claims.

**INTERNATIONAL PRELIMINARY
REPORT ON PATENTABILITY
(SEPARATE SHEET)**

PCT/EP2004/005079

Re Item V**Reasoned statement with regard to novelty, inventive step or industrial
applicability; citations and explanations supporting such statement**

In light of the documents cited in the international search report, it is considered that the invention as claimed in the independent claim 1 meets the criteria mentioned in Article 33(1) PCT, i.e it appears to be novel, to involve an inventive step and to be industrially applicable.

The closest prior art is considered to be US-A-4 114 721 which describes a method for acoustic detection of a leak behind a casing of a borehole.

The problem described in the application is be able to detect a leak generating a discrete acoustic signal.

The solution provided is by sampling an acoustic amplitude during a recording time period and defining time intervals inside of the recording time to produce several power-frequency spectrum and analysing these to identify a discrete acoustic signal by detecting time and frequency dependant changes of power.

Since none of the documents cited in the ISR teaches in that direction, claim 1 is considered to meet the requirements of Art. 33(2)-(4) PCT.
